DETAILED ACTION

1. Applicant's Application filed on November 02, 2001 has been reviewed.
2. Claims 1-12 have been presented for examination.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. For instance, the content of these claims does not constitute a statutory process, machine, manufacture or composition of matter in which the statutory process must result in a physical transformation.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by C.J. Date, 7th edition, 2000, chapter 21, "Decision Support".

As to claim 1, Date teaches the invention substantially as claimed, comprising:
a modeling step to create a planning cube and set up relationships between users and data [pages 711-715, “Dimensional Schemas”]; and
a using step to delegate planning and coordinate the passing of data [pages 715-720, “Online Analytical Processing”].

Allowable Subject Matter

5. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As to claim 2, the feature that the modeling step comprises the following steps: a) defining one or more dimensions describing the structure of an enterprise; b) defining one or more user classes; c) mapping said user classes to the levels in the structures identified by said one or more dimensions to produce an organisation object; d) creating a cube from said planning data repository; and e) creating a plan from said cube, thereby assigning ownership; and the using step comprises the following steps: for each contributing manager or contributor as identified by said organisation object: f) delegating said plan by a superior manager, who may be a plan manager or contributing manager, to a delegated contributing manager or a contributor; g) incorporating changes generated by said delegated contributing manager or said contributor to data within said plan thereby creating a proposal; h) passing by said delegated contributing

Art Unit: 2165

manager or said contributor of said proposal to said superior manager; and i) accepting or rejecting by said superior manager of said proposal, taken together with other limitations of claim 1 was not disclosed by the prior art of record.

Claims 3-7 being further limiting to claim 2 are also objected to.

Claims 8-12 are allowed over the prior art of record.

The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record fails to teach or suggest individually or in combination For each contributing manager or contributor as identified by said organisation object: g) delegating said plan or sub-plan by a superior manager, who may be a plan manager or contributing manager, to a delegated contributing manager or contributor; h) incorporating changes generated by said delegated contributing manager or contributor to data within said plan thereby creating a proposal; i) passing said proposal to said superior manager using said delegation object to ensure validity of said proposal; and j) accepting or rejecting by said superior manager of said proposal, the accepting of said proposal being followed by the steps of including said proposal in said superior manager's proposal and the rejecting of said proposal being followed by the step of sending said proposal back to said delegated contributing manager or contributor for further consideration as set forth in independent claims 8-12.
